

EMPOWERING PEDIATRIC CANCER PATIENTS THROUGH THE INSPIRATION OF SPACE EXPLORATION

NASA, in collaboration with the National Association for Proton Therapy (NAPT) and NAPT-member Fred Hutch Cancer Center, proudly presents MISSION: All Systems GO! — a groundbreaking multimedia program designed to transform pediatric cancer treatment experiences. This initiative leverages the awe and inspiration of NASA's space missions to reduce anxiety, instill resilience, and provide young patients with a unique sense of purpose during their treatment journey.

WHAT THE PROGRAM INCLUDES:

1. Multimedia Resources

- **Mission Brief Video:** Patients will hear from NASA astronaut and medical doctor Dr. Kjell Lindgren, who spent 311 days aboard the International Space Station. Through the video, he shares astronaut-inspired tips for staying brave in tight spaces, wearing custom gear, and overcoming "mission jitters."
- **Congratulations Video:** A celebratory video to honor patients for completing their treatment "mission," marking their courage and resilience.

2. Mission Toolkit

Equip your center with the tools to inspire and immerse patients in their own space journey:

- **15 Printable Posters & Banners:** Featuring stunning NASA imagery, ideal for decorating treatment rooms.
- **4 High-Resolution Wall Decals:** Transforming spaces into "Mission Control Centers."
- **Certificate of Completion:** Personalized with your center's name, the patient's name, and signatures from NASA astronaut Dr. Kjell Lindgren and NASA's Chief Health and Medical Officer, Dr. James Polk.

3. Downloadable NASA Imagery

- **Iconic Space Exploration Images:** Including Hubble's "Pillars of Creation" and the Mars Helicopter.
- **Mission Posters:** Perfect for patient inspiration during treatment sessions.

LAUNCH MISSION: ALL SYSTEMS GO! AT YOUR CENTER:

Join Fred Hutch and other NAPT members in transforming pediatric cancer treatment with MISSION: All Systems GO!. **Download the complete toolkit from the NASA website and start inspiring the next generation of space**

NASA TOOLKIT INCLUDES:

- Mission Brief Animated Video
- Congratulations Video
- Printable Posters
- Wall Decals
- Certificate of Completion Template
- Imagery for Patient and Clinic Use

**DOWNLOAD THE TOOLKIT
FOR YOUR CENTER**

NASA's MISSION: All Systems GO! is a set of images, videos, certificates and related materials (the "Materials") intended for use by healthcare providers to assist in reducing the anxieties of children and other patients facing difficult treatment protocols for cancer and other maladies by comparing their challenges with those of NASA astronauts about to embark on a mission to space.

The National Association for Proton Therapy (NAPT) and its members support cancer research and treatment innovation and are committed to raising awareness about the value of proton therapy among policymakers, insurers, caregivers and patients to ensure that this advanced treatment modality is affordable and available in communities across the country.
